

TRAFFIX MANAGED TRANSPORTATION IMPLEMENTATION METHODOLOGY

METHODOLOGY

Overview of TRAFFIX' integration, pre-deployment, and deployment phases

TRAFFIX' implementation methodology **consists of a proven 5-phased approach** built on project management best practices. Each phase is tailored to your business and the agreed upon solution design. Weekly calls are established to meet as a group to ensure alignment around key decisions and open items.

DISCOVERY

- ✓ Project Team selection
- ✓ Kick-off meeting
- ✓ Requirements gathering
- ✓ Process mapping

PLAN

- ✓ Map processes, SOPs
- ✓ Define training/transition plan
- ✓ Define interfaces
- ✓ Gather network information

BUILD

- ✓ Build interfaces, users, reports
- ✓ Upload trade partners
- ✓ Upload facilities, commodities
- ✓ Establish baseline, cost savings

TEST

- ✓ Internal interface testing
- ✓ Test optimization parameters
- ✓ End-to-end testing
- ✓ Customer training

DEPLOY & STABILIZE

- ✓ Deployment readiness prep
- ✓ On-site support (if needed)
- ✓ Phased network roll out
- ✓ Hypercare support

CUSTOMER JOURNEY

A detailed overview of your journey from discovery to execution

PHASES

Business Processes	Services Key Activities	Measurement/ KPI's	Technology Key Activities
SELECTION			
Account Setup	<ul style="list-style-type: none"> Execute Contract Communicate to TRAFFIX Shareholders Set go-live and imp. plan Identify core team Formalize implementation team Account setup 	<ul style="list-style-type: none"> Volume Under Platform (VUP) Freight Under Management (FUM) 	<ul style="list-style-type: none"> Platform demo Integration approach Technical requirements validation Customer sign-off
IMPLEMENTATION			
Onboarding	<ul style="list-style-type: none"> WOW session to validate SOW and develop plan Align & mobilize resources System integrations Develop procurement strategy Finalize business rules for execution Revisit SLA's 	<ul style="list-style-type: none"> Baseline Network Cost Annual Budget Definition of successful partnership Formalized WOW 	<ul style="list-style-type: none"> Formalize integration approach & scope Build interfaces User and business rule system configurations Integration testing
DELIVERY			
Plan	<ul style="list-style-type: none"> RFP & Bid Management Carrier procurement and contracting Finalize routing guide Order planning & optimization Finalize governance plan in place 	<ul style="list-style-type: none"> Projected cost savings or avoidance Carrier responses 	<ul style="list-style-type: none"> User testing Business rule testing Optimization testing Routing guide build and testing E2E testing
Execute	<ul style="list-style-type: none"> Mode and Carrier Selection Shipment Execution Track & Trace Exception Management Visibility Coordinate Location Activity 	<ul style="list-style-type: none"> OTP, OTD, Tender Acceptance In-Transit Exceptions Customer-Specific KPIs 	<ul style="list-style-type: none"> Monitor for gaps in visibility to orders or shipments Workflow board to support lifecycle of load Setup exception alerts
